

NGUYỄN THANH TRÚC

JAVA JUNIOR DEV

ABOUT ME

I'm a second year student at FPT Poly college. My major is Java web (Spring Boot). Previously, I participated a contest at school, so I learned something, some very cool framework – NodeJS, ReactJS, React Native. And I used to have a internship for a start-up company, they use Golang for their main programing laguage, my job is writing API and discussing and give advice for the database. With this new job, my plan is investing atleast 3-4 years in Java (Spring Boot), because i want to be a master of Java before i have a chance to learn new technology, new programing language.

GitHub	<div><div></div></div>

AWARD

TOP 15 FPT NIHONGOENG 2020

Semi-final award

I used to win the top 15 English contest which organized by FPT education incorporation

PROJECT

FPT RESEARCH FESTIVAL 11/2020 - 2/2020

Description: Build an mobile app for student at every levels of education, the target of our project is giving solution for student who face problem in homework.

Technology: HTML5/ CSS3, Bootstrap, React Native, NodeJS, MongoDB

Team: 1 lead, 3 dev Front-end, 2 dev Back-end

Position: Back-end dev

About the project: Our mission is conneting student and teacher (lecture) closer, especially in the corona pandemic. Teachers, they wanna earn more by remote teaching, they can come to this app and type their major and levels of education which they can show their qualification best. When students have problems in their homework, they can exchange with random teacher who selected by the app indirectly through the app's video-call. With the first time using, we give you 2 hours free, after that if you believe and wanna continue using, you can pay with bank card. And the money will be shared for teachers and the app's owners.
